

# New Pond Management Class

**Saturday, October 3, 2015**

**Location: Grass Valley, South County**

Struggling to evict scum from your pond? Are weeds or algae getting the best of you? Planning to build or renovate a pond or small lake (1/4 to 20 acres in size) on your property? Would you like to learn how to enhance your pond for better fishing, irrigation, swimming or fire protection?

Learn about the important physical characteristics of good pond construction, depth, islands, aeration, side slopes, as well as sealing a leaky pond. Pond ecosystems, aquatic plants for both in the pond and around it, how to get started with your pond construction and how to best manage your pond too.

This will be an all day class 8am to 1pm – Tuition is \$60 per person

This class will have both classroom instruction and hands on pond related activities. Please bring a comfortable chair, a notebook, your questions, pictures of your pond, zip locked samples of any aquatic plants, or weeds, you need identified and your sack lunch . . . We look forward to seeing you there!
